

October 26, 2009

To whom it may concern,

Nova Scotia Power Inc. is the largest wholly-owned subsidiary of Emera Inc. (TSX-EMA), an investor-owned energy and services company. Nova Scotia Power provides more than 95 per cent of the generation, transmission and distribution of electrical power to 482,000 customers in Nova Scotia.

Our Energy Efficiency team purchased a Candura EnergyPro instrument in 2008. We frequently use the instrument to verify energy and demand savings associated with retrofit projects under our Commercial and Industrial Custom incentive program.

Having now used it in a wide variety of commercial and industrial applications, we have encountered no problems with the EnergyPro. We have found it to be well-designed, user-friendly and robust. The Power View software has been similarly easy to use and has worked flawlessly.

Although we have had no problems with the hardware or software, we have found the personnel at Candura very helpful and we are happy with the support they have provided. We would certainly recommend this product to others.

Yours truly,

Charles (Chuck) Faulkner, P. Eng.
