To Whom It may Concern:

Re: Candura Instruments Letter of Reference

I am an Energy Auditor working for various Local Distribution Companies in Ontario. I first purchased an EnergyPro power analyzer in 2009 from Candura Instruments. I have now purchased a total of four (4) EnergyPro power analyzers. My energy audit works require power monitoring meters that are accurate, robust, reliable, easy to use and safe to operate on live 600 volt electric panels.

I strongly recommend Candura Instruments. Their meters are excellent especially the self-charge feature using the voltage probes while the EnergyPro power analyzer is monitoring. Their services are fast and friendly.

Yours truly,

Lawrence Wu, P. Eng., CMVP
